“Our goal is to provide hardware and software solutions to dedicated Human Performance and Leisure Professionals who want to revolutionise their Training and Public Entertainment Programmes.”

BATAK PRO

How does BATAK Pro differ from other fitness equipment?

First...according to the 'Georgia Tech Sports Medicine and Performance Newsletter' ...

"... Study after study has shown that reaction time - that period between the introduction of a stimulus and the first observable response - can be improved...There will always be individual differences, but each person can learn to reduce reaction time...There is ample evidence that strength training, aerobic and anaerobic development and sports skills should be practiced in a manner that simulate game or event conditions. Movements that are practiced in game-like situations are likely to be used in competition..."

THE OFFICIAL BATAK E-BROCHURE

WWW.BATAK.COM

Tel: 01293 431065

Hence BATAK Pro....a piece of equipment specifically designed to improve reaction, hand eye co-ordination and stamina by enabling sportsmen and women to train under simulated 'sports like' conditions, whilst also providing an element of fun and competition that is so often lacking in training.

BATAK Pro Configuration

Twelve visually bright LED cluster targets are numbered and arranged in a 'maximum stretch' type configuration and put under the control of a dedicated microcomputer. The targets may be lit up in either random or repetitive ways.

Hits and misses are timed and scored on a central Liquid Crystal Display (LCD) and verbal instructions are issued to the participating Player during the exercise as appropriate..(e.g. "Get Ready"..."Go"..."Level one"..."Time Out"....etc.)

An invisible Infra Red 'Strike Back Beam' is located at midriff level and is used to make a 'strike' at a Player during the Workout routine...(i.e. the player may be given one second to avoid the beam or 5 points will be deducted etc.)

BATAK Pro can also be used with two optional 'sprint mats'...Black and White...so the Trainer can set up player movement in the third dimension. Ideal for 'shuttle runs' under controlled conditions for example.

These two sprint mats may be positioned anywhere within, for example, a 10 metre radius of BATAK Pro for use in a large Gymnasium complex or Training Hall.

BATAK Pro programs cater for ALL levels of skill and is suitable for people of all ages, providing each user with their own 'personal best'. Achievable goals can be set in Club type situations.

Other Uses

Mathematical and Mind Games can be catered for.

Players who are partly Paraplegic or disadvantaged in other ways may be catered for.

Even Players who are blind or short sighted can use BATAK Pro... How? The machine can call out the numbers for each illuminated target...spatial awareness is often heightened in people with a loss of sight.

What do your clients think of BATAK?

"Two BATAK wall's form an integral part of the 'Sportsview' section of the Museum's new Science of Sport exhibition. The walls form part of an exhibit that demonstrates the importance of reaction speed and hand-eye co-ordination. Since opening in March 1997 the Science of Sport has proved extremely popular with Museum visitors and our two BATAK walls have proved to be valuable educational tools."

**Dan Wolfe, Marketing Manager Science of Sport Exhibition
Science Museum**

"BATAK is excellent for developing faster reactions and improving body co-ordination for players of all ages and abilities. Our young players have shown up to a measured 25% improvement in reaction time."

T. Smith, LTA National fitness coach Bisham Abbey

"BATAK has proved both enormously useful and popular in our recruitment training. Please do not hesitate to quote my satisfaction with BATAK."

Inspector P. Hodgkinson Hendon Police College

"BATAK - a new age of sports technology set to revolutionise fitness training into the next century..."

Director of the Sports Academy

Is it possible to run BATAK Pro using battery power?

Yes. BATAK Pro can be run from a standard 12v vehicle battery for well over 24 hours with the available special adaptor.

Does BATAK Pro come with a manual?

Yes. There is a manual for the standard machine which explains everything you need to know.

Can the BATAK Pro firmware be upgraded?

Yes. Basically we provide a new drop in replacement chip which can be installed in less than 5 minutes.

THE OFFICIAL BATAK E-BROCHURE

WWW.BATAK.COM

Tel: 01293 431065

What are the technical specifications?

The BATAK Pro frame is manufactured from strong tubular steel sections and finished in a plastic spray paint.

BATAK Pro weighs approximately 45kg including its free standing feet.

The approximate overall space requirements (in millimetres) are:

- a) Wall Mount - 1700(w) x 130(d) x 1950(h)
- b) Free Standing - 2080(w) x 950(d) x 1950(h)

(Allow a playing space of 1 metre in front of the machine)

World Wide power supply 90-240 Volts A.C. or Direct 12V Vehicle Battery Input with a special Adaptor.

The play interface operates at 12 volt DC for total player safety.

12 Polycarbonate high impact resistant and high intensity LED cluster targets.

High contrast central 2 line x 20 Character Backlit Liquid Crystal (LCD) Display.

A totally dedicated microcomputer and digital sampled speech and sound effects guide the player through each session.

24 BATAK Pro routines are supplied as standard.

2 external Sprint Mats (supplied) cater for 3-Dimensional workouts.

2 LED Displays (3 digit) are ideal for team workouts and spectator viewing.

BATAK Lite Configuration

Eight 'visually bright' LED numbered targets are put under the control of a dedicated microcomputer.

Depending on the selected program the targets may be lit up in **random** or **repetitive** ways.

Hits and misses are timed and scored on two centrally located LED displays.

Verbal instructions are issued to the participating Player during the exercise as appropriate (e.g. "Get Ready"..."Go"..."Time Out" ...etc.)

What BATAK Lite Routines are included?

- 1) **ACCUMULATOR** - 30 secs
- 2) **ACCUMULATOR** - 60 secs

THE OFFICIAL BATAK E-BROCHURE

WWW.BATAK.COM

Tel: 01293 431065

3) **BATAKATHON** - 3 mins

The Accumulator and Batakathon programs, consist of randomly lit targets. The targets remain on until struck out. The user sets the pace – slow – or – fast – or – speedup.

The total score is shown on the 'A' display, the time on 'B'. This routine is ideal for warm-up sessions.

4) **50 TARGET RACE**

The user must strike out 50 targets at random as quickly as possible. The number of strikes is seen on score 'A' and the time measured to one tenth of a second, on score 'B'. If the time taken is longer than 100 seconds then BATAK will end the routine by saying 'Time – Out' and also zero any score.

5) **4 CORNER STRETCH** - 100 targets

Score B counts down 100 targets. The user must strike out the illuminated random corner target within one second to score a point.

6) **50 TIMED TARGETS** - 1 second targets

In this program you have 50 timed targets which illuminate at random. The right hand score 'B' counts down from 50 the number of shots, to zero, whilst points scored are shown on 'A'. The targets remain on for one second. If you strike the wrong target or strike one 'out of time' then the game speeds up!

What are the benefits of using BATAK Lite?

- Improves reaction time
- Enhances hand-eye coordination
- Boosts stamina and fitness levels
- Minimum space requirements for maximum exercise potential
- Variable speed accommodates users of all ages and sexes
- No special kit required

THE OFFICIAL BATAK E-BROCHURE

WWW.BATAK.COM

Tel: 01293 431065

BATAK Duel consists of two single machines back to back, separated by a transparent shatter proof Polycarbonate screen to prevent player contact.

The routines are selected via three large illuminated buttons on the front console.

Audio sound effects are used to register hits and misses.

This equipment is totally dedicated to player safety, the electrical play interface operating on only 12V DC.

BATAK Duel has been specifically designed to operate Worldwide on all International mains voltages.

The concept of two competing players was originally seen at our Millennium Dome exhibit at Greenwich in the year 2000.

The players compete to achieve the highest score in 60 seconds, both sides being synchronised so that players are presented with the same target sequence.
